

As a firefighter owned company, we have a sincere appreciation for preserving the safety of firefighters and those you serve. Firefighters are at a higher risk of developing cancer than most other professions. We make it our goal to not let dry time prevent you from washing turnout/bunker gear as often as you need to. Our gear dryers are designed to dry your gear quickly, safely and efficiently to NFPA 1851 standards-allowing for more frequent wash cycles to rid gear of carcinogens and chemical components.

We are proud to salute one lucky fire department with this \$8000 Hometown Heroes grant to be used toward the purchase of a Ram Air Gear Dryer. Please complete the form below to apply.

Requesting Department Name * Department Zip Code *

Applicant Name * First Last

Email * Phone *
