

MCIVER ROAD PEDESTRIAN IMPROVEMENTS

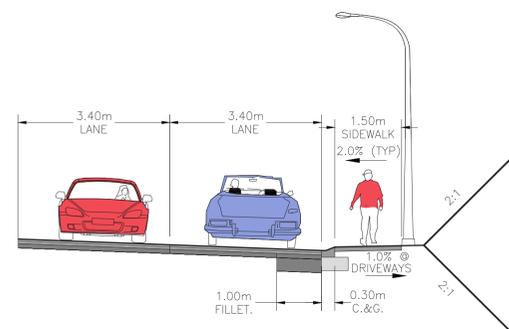

The project will provide McIver Road with sidewalk and curb-and-gutter on the east side of the road.

The existing McIver Road is narrow with an approximate 7-metre paved width, with steep slopes and driveways. This leads to the following design constraints:

- Cyclists will share the road with vehicles.
- Street lighting is on the outside edge of the sidewalk.
- The roadway shoulder will be removed, limiting on-street parking.
- The improvements include an underground drainage system that conveys storm drainage to McTaggart Road Drainage Improvements.

HALF LANE RECONSTRUCTION 0+290 to 0+420
SCALE: 1:100

FULL CROSS FALL 0+440 to 0+650
SCALE: 1:100
