Objection to the proposed rezoning to RC3 2485 Hayman Road

Julia Hargreaves
910 Stuart Road
West Kelowna BC V1Z 1H1

19 Mar 2021

A man called at my door asking me to sign a form for a rezoning proposal on 2485 Hayman Road. I thought he was actually against the proposal. I realized my mistake once he left with my signed copy and I now wish to withdraw my original consent and object formerly to the rezoning.

I wish to object on the grounds that the proposed rezoning is going to affect the neighbourhood negatively by increasing density, traffic and noise. And the privacy of the residents living right next to the property.

Traffic is an issue. Stuart road is already getting increased heavy vehicle traffic since the completion of Bouchery upgrades. What used to be a quiet road is now subject to speeding traffic and trucks. Setting a precedent for increased density in the area as a whole is putting a strain on residential roads not designed to take high traffic loads.

Lakeview Heights is a special neighbourhood. Residents here bought their homes because they want the rural character of the neighbourhood, with large yards, no street lighting or sidewalks. If this density increase rezoning goes ahead more people will take advantage of this precedence, ruining the character of this great neighbourhood.

The builder is making a profit from their new build, which usually devalues a neighbourhood and kills its soul. The owner will not be resident after the build is complete.

Please do not let this happen in our very special neighbourhood.

Hello,

Please see the signed petition below in regards to the RC3 zoning application. I live at 2418 Crestview Road and we would like to keep the neighbourhood as a R1 zoning neighbourhood. We do not want to densify the neighbourhood with RC3 zoning. We are comfortable with single family homes with one legal suite per property.

Thank you,

Hayley Newmarch

City of West Kelowna - Objections to the proposed RC3 zoning application File No.: Z 20-05

We, the undersigned owners of property affected by the requested zoning change described in the referenced file, do hereby protest against any change of the Land Development Code which would zone the property to any classification other than R1.

1. We purchased our properties with the expectation that the area would remain zoned R1. Changing the areas zoning to allow RC3 compact developments significantly changes the character of the neighbourhood. The zone change would be inconsistent with current surrounding property use and could result in devaluation of property values.
2. As this proposed RC3 lot is located on a corner property with intersecting roads, adjacent to a stop sign and fire hydrant, our concern is that on street parking issues could arise as a good portion of the property adjacent to the street would not be available for overflow vehicle parking. This would then force vehicles to being parked further along the road in front of neighbouring properties.
3. The RC3 proposal is an attempt to subdivide an additional small lot form an existing R1 zoned property, which is currently being renovated to include two rental units. The concern is the very concentrated living accommodations in a current R1 zoned neighbourhood.
4. It appears that the property owner will not be residing near or on the premises, further contributing to potential noise issues in such a densely populated area, as there is no landlord present to monitor potential bylaw violations.

Attention: City Clerk

We are writing to object to the proposed RC3 zoning application at 2485 Hayman Road. We protest any change of the land development code which would zone the property to any classification other than R1.

As this proposed RC3 lot is located on a corner property with intersecting roads, adjacent to a stop sign and fire hydrant, our concern is that on-street parking issues will arise as a good portion of the property adjacent the street would not be available for overflow vehicle parking thus forcing vehicles to be parked on the road in front of neighboring properties and on Hayman Rd. The recent sale of a 13 acre parcel of land on Hayman will undoubtedly further increase the traffic along Hayman. As well, whenever Boucherie Rd. is closed, Hayman becomes a major Lakeview Heights thoroughfare to Highway 97.

The RC3 proposal is an attempt to subdivide an additional small lot from an existing R1 property which is currently being renovated to include two rental units. The concern is very concentrated living in an R1 zoned neighborhood. Further, if the first small lot is permitted, the owner will attempt to add another small lot on the south side of the existing house. The result being would be two compact houses on either side of the existing house. I own a vacant lot at Crestview and Buena Vista; what is stopping me from selling the vacant lot to a developer who will create two small lots again? The responsible thing to do is build a house under the R1 zoning.

It appears the property owner will not reside near or on the property. So, this will be a multi-dwelling rental property creating noise and other problems, in a quiet, family-oriented neighborhood.

We purchased our property with the expectation that the area would remain zoned R1. Changing the area zoning to allow RC3 compact developments significantly changes the character of the neighborhood. The zoning change would be inconsistent with surrounding property use and could result in devaluation of property values. Is this a part of Council's plan to get the new Fire Hall on Stuart/Harmon Rd, by rezoning from R1 to industrial use for Fire Hall? Will there be consultation with the neighborhood?

City of West Kelowna – Objections to the proposed RC3 zoning application File No.: Z 20-05

Date: 22 March 2021

ATTN: City Clerk File Number (Z 20-05)

Regarding the Property: PID: 006-793-339; Lot # 5; Plan #KAP22622; Address: 2485 Hayman Rd

We, the undersigned owners of property affected by the requested zoning change described in the referenced file, do hereby strongly protest any change of the Land Development code which would zone the property to any classification other than R1.

We, the undersigned object to the proposed rezoning of the subject property being rezoned to accommodate a smaller RC3 lot. We are opposed to this rezoning being approved in Lakeview Heights.

Reasons for Objections:

1. This rezoning will encourage other owners in the area to rezone their property for the purpose of capitalizing on the rental market. This would continue to transform this quiet semi-rural neighbourhood into one which resembles an overcrowded and noisy urban area.
2. The subject property at 2485 Hayman will require driveway access either on Hayman or on Crestview road. This raises tremendous concern for the safety of motorists and families who use the roads continually throughout each day.
3. Hayman road has become busier over the years therefore rezoning at 2485 Hayman Road will only intensify the congestion and safety concerns at the intersection of Crestview and Hayman.
4. In recent years as some properties are purchased, they have become rental properties. Rentals do not provide the same control as owner occupied properties. Multiple families residing on one property poses a significant parking issue on Crestview. Rezoning the lot at 2485 Hayman for two multi-family rental houses will result in more vehicles in the area. This will substantially increase the risk for the safety of children, adults, and motorists.
5. Without exception we are not in favour of the proposed RC3 rezoning at 2485 Hayman Road.

Sincerely,

[REDACTED]

Subject: ZONING AMENDMENT - 2485 HAYMAN ROAD

@ 3:01 PM

I am opposed to this amendment from R1 to R3. I live on Crestview Road and regularly pass this property.

Initially, I thought the plan was for an additional house. Much to my dismay, there are to be 3 houses on this lot - the original house plus two more.

Has there been a change in the requirements that would allow for this drastic change?

In my view this is the tip of the iceberg. It is the start of changing the character of the neighbourhood.

Developers don't care about their neighbours.

Parking: this is on a corner. Hayman Rd. is not the safest road to park on and it is limited. Where will everyone park?

I ask you to reject this amendment.

Regards,

BETTY MAURICE

City of West Kelowna - Objections to the proposed RC3 zoning application File No.: Z 20-05

We, the undersigned owners of property affected by the requested zoning change described in the referenced file, do hereby protest against any change of the Land Development Code which would zone the property to any classification other than R1 due to the following reasons:

1. The zone change seeking high density is inconsistent with the statement in the official community plan (OCP).
 - a. "Ensure that housing development is appropriate and sensitive to the surrounding uses and to the surrounding form and character of the area."
 - b. "Ensure infill housing is sited to complement the type, form, scale, use and character of adjacent buildings and ensure private outdoor spaces are respected."
2. We purchased our properties with the expectation that the area would remain zoned R1. Changing the areas zoning to allow RC3 compact developments significantly changes the character of the neighbourhood. The zone change would be inconsistent with current surrounding property use and could result in devaluation of property values.
3. As this proposed RC3 lot is located on a corner property with intersecting roads adjacent to a stop sign and fire hydrant, our concern is that on street parking issues could arise as a good portion of the property bordering the street would not be available for overflow vehicle parking. This would result in vehicles being parked further along the road in front of neighbouring properties.
4. The RC3 proposal is an attempt to subdivide an additional small lot from an existing R1 zoned property, which is currently being renovated to include two rental units. The concern is the effects of overly concentrated living accommodations in a current R1 zoned neighbourhood.
5. It appears that the property owner will not be residing near or on the premises, further contributing to potential noise issues in such a densely populated area, as there is no landlord present to monitor potential bylaw violations.

I am addressing this letter to council as I moved here to West Kelowna from Surrey nearly four years ago.

You only have to look to Surrey (the lower mainland) at how mega homes with multiple suites and absent landlords destroyed what could have been such a wonderful place to live.

Reasonable subdividing of a large lot can be looked at as proper densifying a neighbourhood. But looking to create multiple suites destroys a neighbourhood. Renters don't have the permanent roots in a area that create HOMES not just houses with a tax base.

Condo's and Apartments plus a inlaw suite are available for people to rent. Area's are gone for this purpose and must be respected.

People make a huge investment to live in a neighbourhood not a rental district.

Thank you for reading what
I have to say about this issue

As this proposed RC3 lot is located on a corner property with intersecting roads, adjacent to a stop sign and fire hydrant, our concern is that on street parking issues could arise as a good portion of the property adjacent to the street would not be available for overflow vehicle parking. This would then force vehicles to being parked further along the road in front of neighbouring properties.
3. The RC3 proposal is an attempt to subdivide an additional small lot form an existing R1 zoned property, which is currently being renovated to include two rental units. The concern is the very concentrated living accommodations in a current R1 zoned neighbourhood.
4. It appears that the property owner will not be residing near or on the premises, further contributing to potential noise issues in such a densely populated area, as there is no landlord present to monitor potential bylaw violations.

City of West Kelowna - Objections to the proposed RC3 zoning application File No.: Z 20-05

We, the undersigned owners of property affected by the requested zoning change described in the referenced file, do hereby protest against any change of the Land Development Code which would zone the property to any classification other than R1.

1. We purchased our properties with the expectation that the area would remain zoned R1. Changing the areas zoning to allow RC3 compact developments significantly changes the character of the neighbourhood. The zone change would be inconsistent with current surrounding property use and could result in devaluation of property values.
2. As this proposed RC3 lot is located on a corner property with intersecting roads, adjacent to a stop sign and fire hydrant, our concern is that on street parking issues could arise as a good portion of the property adjacent to the street would not be available for overflow vehicle parking. This would then force vehicles to being parked further along the road in front of neighbouring properties.
